

Assignment 6

Milestones, Timeline, and Effort Matrix Assignment due 10/15

For this assignment your group will produce a list of milestones and two tables indicating your project timeline and individual efforts on specified tasks.

Milestones List:

Your group will provide a listing of planned major milestones and completed project deliverables in the development of your project. Provide some detailed explanation for each of these milestones and deliverables.

Table 1. Timeline:

Your group will list all tasks associated with your project (from task list assignment) and indicate the range of dates (start and completion) that this task will be worked upon. Within the table you should include planned completion dates of all milestones indicated in your Milestones List.

Table 2. Effort Matrix:

Your group will produce a table indicating a breakdown of how much effort each group member will apply to each task. You can provide percentage of effort or hours of effort; the goal is to create a table that meaningfully represents your expected division of labor for all tasks. As indicated in your task list, there should be a team member of primary responsibility for each task.
